PROFILE

Creative and solution-oriented web developer, experienced in identifying and implementing opportunities for improved efficiency and reduced cost, with a never-stop-learning attitude and skilled in collaborating with interdisciplinary teams. Able to build responsive applications from scratch (desktop and mobile), using JavaScript both on the server side with Node.js and Express to build APIs, and to create complex UI on the client side using frameworks such as Angular and React.

SKILLS & TOOLS

Front-End:

- HTML, CSS, JavaScript, TypeScript
- Angular, React (Redux, Router)
- Responsive Design
- MUI, Angular Material, Bootstrap, SASS/SCSS
- Version Control (GIT)
- Test - & Behavior-Driven-Development (unit, integration, acceptance and end-to-end testing)
- Functional & Object-Oriented-Programming
- Mobile Apps (React Native, Expo, PWA)

Back-End:

- NodeJS & Express
- APIs (JSON, RESTful, Postman)
- Hosting & Web Services (AWS, Firestore, Heroku, Netlify)
- Relational & Non-relational databases: PostgreSQL, MondoDB

EDUCATION

Certificate in Full-Stack Web Development
CareerFoundry GmbH | 2022-2023
- Intense **project-based training** program focused on **MERN stack**
- 500+ hours of hands-on training with guidance of industry leading tutor and mentor

MSc International Business & Enterprise
University of South Wales, UK | 2017-2018

BA Tourism Business Management
Management Center Innsbruck | 2010-2013

WORLD LANGUAGES

German: native speaker
English: fluent
Spanisch: fluent

WEB DEVELOPMENT EXPERIENCE

FULL-STACK PROJECT | CareerFoundry | MyFlix

- Created non-relational database (MongoDB)
- Built a **RESTful API using NodeJS and Express**, using Mongoose to interact with the database
- Used Postman to test API endpoints, deplyoyed API to Heroku
- Built **two responsive SPAs**, one with **React** (following MVC design pattern) and one with **Angular** (using Angular Material)
- Users can set up, edit and delete their accounts, browse movie library, add a favorite movie to their profile and get more information on directors and genres

Anuglar client demo | Angular github respository
React client demo | React github repository

FULL-STACK PROJECT | CareerFoundry | Meet App

- Developed a **responsive, serverless PWA** (offline availability, cross-platform) using React to display events from a google calendar
- Followed **TDD approach**, translating user stories into scenarios for unit and integration tests (Jest), acceptance testing (cucumber) and end-to-end testing (puppeteer)
- Implemented **serverless functions** (AWS Lambda) to authenticate and **authorize** users **(OAuth)**
- Used Kanban board following agile process
